

Senior Full-stack Developer .Net / DevOps

Who we are

ClearOn is leading the development of vouchers and payment services in the retail trade. We also develop and sell POS systems under the brand name Wave. Our focus is to offer services, which create more value at checkout. We do this in close cooperation with the retail trade, suppliers and banks online with 6 000 shops in our innovative clearing system.

Today we are a payment institution under supervision of the Swedish Financial Supervisory Authority and we have 50 years' experience of smooth clearing processes in the retail trade. The company is owned by DLF Sweden (Dagligvaruleverantörers Förbund), an association for companies that produce or import goods for resale to the grocery retail and foodservice markets. ClearOn is on a transformation journey towards modern clearing and payment products and we are looking for more talents to join our IT team.

Aim of the job

You will be part of the ClearOn IT team that is responsible for the software development, maintenance, infrastructure and security of our critical systems; our payment solutions, POS software and coupon clearing house. The IT team includes 20 in-house co-workers and some near-/offshore developers that focus on IT architecture, development, QA and operations.

The main activities / duties:

- Technical expert, senior developer and operational expert for our critical systems that are crucial for the payment transactions.
- Part of a team responsible for the software development, design, code, stability and performance
- Designing, deploying and building secure, stable and scalable systems in a fast pace environment as per the business requirements.
- Assisting in setting up and maintain the internal development environment – full software development lifecycle

Profile

- A professional Full Stack developer with hands on experience and solid knowledge of .Net/C# programming, Javascript (React), REST, SOAP
 - Experience in all aspects of the software development life cycle and system integration
 - Full knowledge of Version Control, Ability to write unit tests, refactor existing code and work with existing codebases
 - Proficient in schema design and SQL
 - Very good knowledge about client-server programming, WPF framework, application integration, data modelling, GIT/BitBucket, Jenkins, SonarQube, ELK, docker
 - Hands on experience with expert knowledge in AWS resources and services.
 - Experience working with agile team methods
 - Knowledge of accepted software engineering practices for the full software development lifecycle, including coding standards, code reviews, source control management, build processes, testing, and operations
 - Strong analytical and coding skills
 - Excellent communication skills
 - Ability to adapt in a dynamic work environment and make independent decisions
 - Above all, the person must be positive and have a team mentality.
-
- Experience at any of the following fields is a merit: POS system, payment methods, Java, SpringBoot, SpringBatch, IntelliJ, Hibernate/JPA, Maven, Tomcat, Xamarin.

Why join us?

- You will have the opportunity to take ownership of your work and be an important player in the outcome of the products that are meaningful for the society we live in.
- We are a people first company with a beautiful water view from our office, you will have the opportunity to develop your skills and we offer a great package including massage at workplace, a good wellness contribution, a health insurance and a good lunch culture (meal allowance).

We would like to know more about you. If you are interested, apply now!
